RELATIVITY
The Special and General Theory

Albert Einstein

Einstein developed the theory of Special Relativity in 1905 and the more comprehensive and far more complex theory of General Relativity about 10 years later.

Special Relativity deals with large velocity differences between frames of reference (Inertial Frames).

General Relativity deals with large acceleration differences between frames of reference (Non inertial Frames)

At low speeds, Newton's laws are adequate to explain motion. But the relativity theories need to be applied to objects travelling at or near c , the speed of light.

Speeds of objects	Inertial Frames	Non inertial Frames
Very much less than c	Newton's Laws	Newton's Laws Plus Fake Forces
Close to c	Special Relativity	General Relativity

3. Alan Turing---„ЕНИГМА КОД„-татко на компјутерите

Turing and Computers

- ▶ Alan Turing (1912-1954)
- ▶ During World War II, Turing's work on code-breaking was instrumental in breaking the "Enigma" code used by the German and Japanese armies
- ▶ Because of this Turing has been called the one individual most responsible for winning the war for the allies

4. НИКОЛА ТЕСЛА--„таткото на струјата,,

Nikola Tesla

demonstrated the wonders of alternating current electricity in Chicago in 1893, which became the standard power in the 20th Century. Tesla designed the first hydroelectric powerplant in Niagara Falls in 1895. The Tesla coil, which he invented in 1891, is widely used today in radio and television sets and other electronic equipment. Among his discoveries are the fluorescent light, laser beam, wireless communications, wireless transmission of electrical energy, remote control & robotics. Tesla is the father of the radio and the modern electrical transmissions systems. Registering over 700 patents world-

-ќе немавме Facebook

-ќе немавме google
